battenfeld-cincinnati Germany starts Construction of a new Technical Center in Bad Oeynhausen

Focus on innovation: start of construction of the new technical center and customer center

Bad Oeynhausen - battenfeld-cincinnati Germany, a leading provider of extrusion solutions, achieves another milestone in its history of innovation and announces the commencement of construction for its new Technical Center and Customer Center. The impressive new building with a floor area of approx. 2,000 m² not only provides space for multiple state-of-the-art extrusion lines but also places a clear emphasis on sustainability and innovative technologies.

The Technical Center serves as a platform to showcase the latest developments in pipe, film, and sheet extrusion. A key focus will be on working collaboratively with customers to develop tailored solutions for their specific products. The variety of available extrusion lines allows for a practical presentation of the broad spectrum of plastic processing.

In addition to technological innovations in the extrusion sector, battenfeld-cincinnati is making a clear commitment to sustainability. The new building has been designed using the latest environmentally friendly technologies to operate the facility as independently as possible. The dedication to environmental protection is reflected in the entire planning and implementation of the project.

On the upper floor of the new customer center, the sales department and all sales-related divisions will find their place to create a seamless connection between technological innovation and customer service.

"Our new Technical Center and Customer Center not only represent our technological leadership but also our commitment to sustainability. We rely on eco-friendly technologies to efficiently operate the building and make a positive contribution to the environment," emphasized Gerold Schley, CEO of the battenfeld-cincinnati Group.

The commencement of this groundbreaking new construction underscores battenfeld-cincinnati's ongoing efforts to push the boundaries of plastic technology while promoting responsible resource management.

About battenfeld-cincinnati:

battenfeld-cincinnati is a leading manufacturer of energy-efficient and high-performance extruders and complete extrusion lines according to customer-specific requirements with production sites in Bad Oeynhausen and Kempen (Germany), Vienna (Austria), Shunde (China) and McPherson, KS (USA). battenfeld-cincinnati offers customized solutions for a wide range of pipe, profile, sheet, film and pelletizing applications from a comprehensive portfolio of single and twin screw extruders, dies, downstream equipment, calenders and laminating lines. battenfeld-cincinnati customers benefit from a worldwide, comprehensive sales and service network.
